THE COMPLETE VETERINARY DENTAL X-RAY SOLUTION

EVA Vet™ Select II Dental X-ray Sensor/Dental X-ray Generator/ViewAll™ Dicom Acquisition Software

Each EVA Vet™ System Includes:

- EVA Vet™ Select II Sensor, size 1.5 or 2.0
- ViewAll™ 5.0 DICOM Acquisition Software (License for up to 19 Workstations)
- Patented Sensor Armor® for added protection
- Starter Kit of Disposable Protective Sheaths
- FREE Lifetime remote diagnostic services and online tech support
- FREE Enrollment in IWV's Customer Loyalty Replacement Program
- In-clinic training options
- 24-Month Limited Warranty

EVA Vet™ Select II Sensor - Features and Benefits

- Excellent image quality, clarity, resolution, definition and contrast
- EVSII size 2.0; Sensor - Dims: 1.25" x 1.70"; Resolution: 25+1p/mm
- EVSII size 1.5; Sensor - Dims: 1.15" x 1.50"; Resolution: 25+1p/mm
- Simple to use with robust design
- Experience of over 10,000 installations
- Direct 3 meter USB 2.0 connection
- ViewAll™ 5.0 Vet Acquisition Software provides full DICOM compatibility and full integration with most PACS
- Instant and secure storage and retrieval of images
- Certifications: MFDS, CE/MOD, FDA, Health Canada

(Laptop Optional)

GENERATOR OPTIONS

FleXX™ Portable Intraoral Dental X-Ray Generator

Features and Benefits

- **Portability:** Weighing only 4 lbs, the Flexx can be used anywhere in the clinic allowing faster radiographs, and requires no installation.
- **Safety:** The FDA approved Flexx with its oil-cooled Toshiba tube uses double lead shielding to prevent x-ray leakage and generates less radiation than conventional systems.
- **Easy of Use:** The Flexx is easily operated with one hand to allow radiograph production by only one person. It includes double wrist straps, and right and left exposure buttons for bilateral operation.
- **Included:** High Frequency 60kV / 2mA generator with 2 High capacity Lithium-ion batteries (up to 500 shots per charge each), shoulder/neck strap, and scatter shield.

ISDC Intraoral Dental X-Ray Generator

Features and Benefits

- **High frequency generator:** 55 - 70kV/4 - 8mA with a 0.5mm focal spot
- **Best image first time, every time:** Power Factor Correction assures highly stable and consistent output regardless of quality of input power source.
- **Reduced dosage:** Patented shielding method makes leakage close to zero. The ISDC system significantly reduces harmful soft radiation compared to conventional AC type machines.
- **Long lasting quality.** Life cycle tested both mechanically and electrically over 200,000 cycles. Refined arm movement with "Zero-drift".
- **Enhanced workflow:** LCD display with bright screen displays technique information clearly from any angle. Easy to understand icons quickly identify tooth, receptor type and patient size. Thirty pre-programmed technique settings streamline set-up and preparation for every procedure and every receptor.
- **Wall mounted or rolling cart**

Recommended PC Specs: Intel® Core™ i5, 2.30 GHz, Dual-core, 8 GB standard memory, 500 GB hard drive, 15.6" Full HD LCD, resolution 1920 x 1080.
